

Berit Gullbransson, Former Director of Environmental Affairs at SCA Tissue Europe, was appointed by the Swedish Government in 2006 as Director General at SWENTEC – Swedish Environmental Technology Council.

Berit Gullbransson has a withstanding experience within the field of environmental affairs; being a civil engineer graduate from Chalmers University in 1975, Mrs Gullbransson has successfully pursued her career since then holding leading positions at SCA Mölnlycke, EKA Chemicals and Papyryus.

SWENTEC is an initiative within the Swedish Governments office. SWENTEC assures the governments operations within the field of Clean-Tech and co-operates closely with the industries, other governmental authorities and organisations.

The mission of SWENTEC is to enhance Swedish clean-tech companies' business opportunities and competition on a global scale. The action plan for 2009 focuses on increased growth and exports.
