

# NORDIC TRAFFIC AB

**Nordic Traffic AB is a small company dealing with LED-Technology. We are developing own products in Traffic Signals and warning lights.** The modern traffic signal head, NTK, is the first of its kind in the market. The head is designed for LED's as light source. Like electronics in general, LED's don't like heat. To enable the LED-units sufficient cooling the signal head is designed of an extruded aluminium profile. The profile will work as a convection shaft. An air stream, that will lower the temperature, is created and the LED-units is getting a more ideal environment that positively effect both performance and life length.
