

Under the Patronage of H.M. King Carl XVI Gustaf of Sweden, World Bioenergy – Clean Vehicles & Fuels (WB-CVF) is a special flagship event unlike any other. Organised by a consortium of nine stakeholders in association with the Swedish EU presidency, WB-CVF is three intensive days of conferences, study tours and networking.

Focused on the practical implementation of bioenergy and sustainable transport systems, the excursions highlight commercial examples of CHP, biofuel usage and much more from the greater Stockholm area. Over 150 top names will converge in Stockholm to speak and share their expertise and experiences, providing invaluable insights and networking opportunities. In cooperation with the Enterprise Europe Network, matchmaking services will be an integral part of WB-CVF participation.

The Swedish Ministry of Enterprise, Energy and Communications will host an official EU policy conference “Bioenergy – A sustainable resource for an efficient system approach” exclusively for Director Generals from the EU 27 energy ministries during WB-CVF.

Ensure you convert contacts to contracts, register on www.wbcvf2009.se today!

Specially commissioned as part of Sweden's EU-Presidency 2009, it is proudly organised by:
