

# CleanTech Demonstration Arena

CleanTech  
Demonstration  
Arena

**CleanTech Demonstration Arena put the spotlight on the importance of demonstration installations in the development of cleantech companies.** To prove that a new technology is viable, the customers want to see a working installation where the new system has been put to use and proofs on the function. The project aims to raise the level of understanding among local authorities and project consultant of the importance of demonstration facilities for local companies.

The first part of the project is to map interesting demonstration facilities in the County of Västernorrland and to market them to visitors both from Sweden and abroad. The second part of the project is to build a demonstration facility in Härnösand to evaluate methods to display a concept.
