

# Baltic Sea Solutions

**Baltic Sea Solutions (Bass)** is a non-profit organisation working with consultancy and project management within the field of sustainable development, targeting the sectors of renewable energy and environment. Using well established national and international funding, business and research networks, Bass is able to add a holistic dimension to the development and implementation of green business strategies, climate strategies, market opportunities and industrial and urban regeneration plans, hereby increasing the amount of value-added spin-offs within environment, education, welfare, employment and commercial sectors on regional, national and international levels.

**Baltic Sea Solutions - energizing sustainable development**
