

Engy AB

Engy AB – Efficient energy solutions for the local community!

Engy offers major energy consumers an opportunity to reduce costs, increase operational margins and raise the value of their properties. At the same time, compliance with current climate and environmental requirements is also made possible.

Engy's unique concept:

Supply means that Engy offers green and environmentally certified energy direct from the source, on the basis of specific customer needs and the prevailing local circumstances.

Demand means that Engy identifies total actual energy requirements and adapts energy consumption to the specific needs of the operational activities. Engy also works to ensure that energy is utilised in accordance with the requirements and wishes of the tenant or end consumer.
