

# Arena Miljölänet Västernorrland

**ARENA**  
**ENVIRONMENTAL FOCUS**  
VÄSTERNORRLAND

**Arena Environmental Focus Västernorrland is a project designed to shed light on environmental and energy-related issues and is set to run from 2008 to 2010.** We are working within five different areas in order to spread information, generate debate and get businesses and the general public involved. The central theme of our efforts is environmentally-driven development. This means we aim to achieve sustainable development for our community and within business development. Choose the form of participation that best suits you and become a part of Arena Environmental Focus Västernorrland!
