

**In Sweden and internationally FVB is a leading energy consultancy within Heating, Cooling, Combined Heat and Power processes.**

FVB has decades of experience in sustainable and integrated energy solutions combining engineering expertise with a sound understanding of profitability and the need to reduce our environmental footprint. Our offices in Sweden, Canada, the United States and Bahrain offer our clients added value through local representation in a globalized market.

Through our independence and professional scope we will provide everything needed by the client, from markets analyses and customer communication, by feasibility studies, design and construction management, to commissioning and provide documentation.
