

NRC

Swedish National Federation of Resource Centres for Women (NRC) is the most effective source for engaging women in sustainable regional and local development. NRC's mission in regional development, given by the Swedish government, is through coordinating and supporting regional and local resource centres and networks, to work to ensure that - women claim their share of society's resources - women's competence is utilized by society - efforts made by women and men are equally valued.

The NRC works to ensure women's inclusion and participation on equal terms in growth and development work locally, regionally, nationally and internationally. This work is conducted on various fronts, such as the labour market for women, entrepreneurship and business administration, leadership and management issues, health, women and technology, and the conditions and opportunities for young women.
