

Peas on Earth

peas
onearth

PeasOnEarth, owned by Ecoetanol @ Sweden AB, is a concept for extracting ethanol, fibre and protein, and green manure from legumes. Ecoetanol @ Sweden AB develops facilities for the production of ethanol from legumes, and offers necessary maintenance services. Benefit for the customer – profitable companies in the country-side, cheap and clean energy together with good food.

The first plant is scheduled to be ready for ethanol production in autumn 2009. Potential customers are welcome to contact inventor and founder of PeasOnEarth - **Janne Lundh**.

...The level of CO2 will be reduced for every km you drive your car on Peas on Earth ethanol.
