

## Municipality of Vrilissia

The Central square of Vrilissia lighted with photovoltaic system

Pedestrian and bicycle way

The 3rd Municipal Kindergarten with green roof.

**Since 2000 the Municipality of Vrilissia has been applying projects and programs concerning bioclimatic planning both in buildings and open spaces and also ways to reduce energy waste and cost.**

**Some of the projects and applications already implemented in Vrilissia are the following:**

- The 3rd Municipal Kindergarten with green roof.
- The Central square of Vrilissia lighted with photovoltaic panels.
- The Maria Callas Park also lighted with photovoltaic panels.
- Electronic system of remote control and adjustment of city street lighting.
